To check that the computer recognizes the new memory:

- Start up your computer.. - 667 MHz, PC2-5300, DDR2 compliant - Unbuffered - Non-parity - 200-pin Not compatible: - Registers or buffers - PLLs - ECC - Parity - EDO RAM

Additional notes

For best performance, use two SO-DIMMs (one in each slot) of the same DIMM size (example: two 512 MB SO-DIMMs).. Do not install memory while your Mac mini is plugged in

Step 1: Remove the bottom cover

- Turn off your Mac mini.
