You can change the length of a selected transition or all transitions in a project.. Transitions are set to one half of one second by default, and a transition can never last longer than half the duration of the shorter clip on either side of it.. To view these styles in the Transitions pane, click the Transitions button in the toolbar or choose Window→Transitions.

Jun 25, 2017 - Is there a way to automatically put the chosen transition between each photo beside manually changing each one? Yes, you can change all of the transitions at once.. Select the Add Automatically box Deselect this option if you want to edit or delete any transitions in your project.. You can preview other transitions by placing the mouse pointer over them When you choose the transition you want, drag it between two clips in your project. ae05505a44 [Mori Seiki Sl 15 Manual](#)
